

FizzBuzz (< 15 mins)

Output all numbers between 1 and 100 and replace multiples of 3 with **Fizz**, multiples of 5 with **Buzz** and multiples of both with **FizzBuzz**

```
//Example output
1
2
Fizz
4
Buzz
Fizz
7
// etc ...
13
14
FizzBuzz
// etc ...
```

Books (> 60 mins)

Create a simple web app that lists all book titles from the book.xml file. Each title should display the following information; Title, Author, Genre, Price, Publish date and Description. Bonus points if it also looks nice...

Extra 1: Make it possible to filter the list based on Genre.

//Example
